

## ACTION AVALANCHE PROBE

6-part aluminum avalanche probe for professional search action.

**TYROMONT** avalanche probes are manufactured from **special high strength aluminum** - alloy. The single parts are connected by precision screwjoints, which **guarantee a perfect alignment of the probes**.

Due to the screw-lock, in case of a damage of one part of the avalanche probe, this part can be replaced by another one and therefore operational reliability of the avalanche probe is guaranteed.

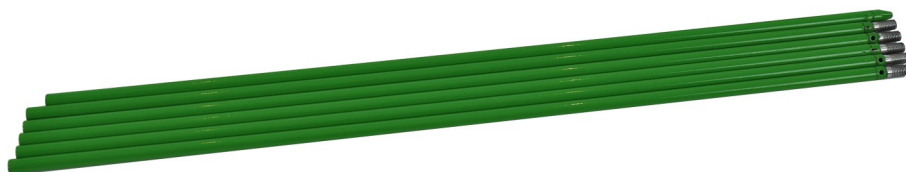

**The avalanche probe for professional search** action of rescue teams. Long enough for large avalanches, stable enough for rough action.

Total length of 3,60 m, divided in 6 parts of 60 cm each.

**Manufactured from high-strength aluminum alloy**, with anti-freezing surface treatment. Green signal colour.

**Connection** of the parts with inserted screw-joints.

**Complete** with storage bag and wrench.

Art. No.	<b>93013</b>	
Dimensions	Length:	3.600 mm
	Width:	560 mm
Weight	Total:	3,7 kg
