

Rescue Seat TYRAH AR

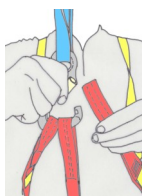

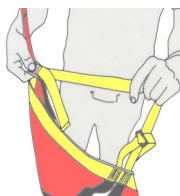

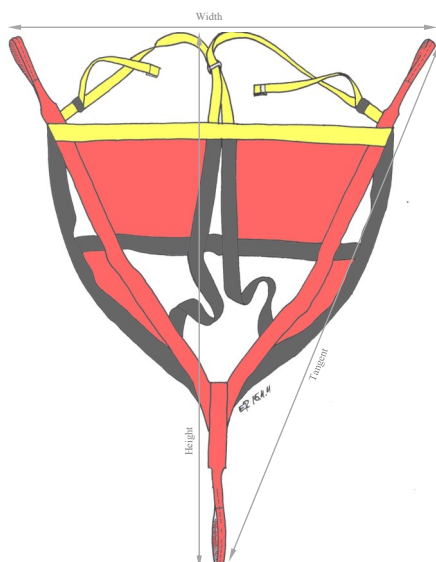

Entirely new developed slip-on harness, combines the advantages of a rescue triangle with the comfort of a seat harness.

Due to the new concept, the patient is lifted in an ergonomic sitting position -> **no pressure on all the sensitive areas of the lower body!**

One size fits all – from children of **20 kg** up to heavy weights of **150 kg**. The TYRAH is designed to adapt by itself to all the different body sizes without the need to select from different suspension points.

High quality belting and cloth materials, made in Europe.

Art. No.	93222	
Weight	760 g	
Dimensions	Width:	1.140 mm
	Height:	1.160 mm
	Tangent:	1.400 mm
Work Load	> 20 kg up to 150 kg
