# RBS - TACTICAL
# ROTATION BRAKE SYSTEM

Removable system to prevent or stop rotational movements.

**High - effective aerodynamic system to avoid or stop rotational movement** of a rescue bag in downwash on a hoist cable or fixed rope. Absolutely easy and logical control through the rescuer without any electronic or mechanic components. No assistance and no lines from the ground any more!

The **Rotation Brake System (RBS)** is attached to the rescue bag with large area Velcro and security belt. If it is not applied, it simply sits flat on top of the bag, for action it is simply pulled up by one hand.
