

AKJA TRANSPORT FRAME TYRmove

Struts and belts for
für optimale fixation
of half- Akja.

Two pair of poles can
be fixed within the
straps. Therefore no
shifting of the load is
possible.

Comfortable, energy-saving carrying case for high alpine use.

Easily attach and carry rescue stretcher, divisible akja, vacuum mattress and the like.

Special connection with strut and fixing belt. The pair of drawbars can be attached to the fixation strap using special strap eyelets.

Your own backpack with the man's equipment can also be fixed.

The shoulder strap and hip belt of the Kraxe are well padded and serve as protection against pressure points. The V2 carrying system is dimensionally stable and durable.

No shifting of the load while walking - especially important in inaccessible terrain. The load is fastened using three fixing straps with a stable clamp. Very robust and easy to use system.

Sturdy aluminum frame and comfortable carrying system enable versatile use - load capacity up to 50 kg.

A 25 cm deep arm with stand serves as the loading area. The stand enables a secure stand - even on uneven terrain.

This also offers additional mounting options.

Scope of delivery: two pieces of carrying case TYRmove incl. two struts and fixing straps per piece.

Art. No.	93800
