

# MARKER FLAGS

**Marker flags for avalanche operations.**

These marker flags were specially developed for use in organized avalanche rescues. They serve to clearly demarcate the search area, as well as to mark found objects and the entry and exit paths in the avalanche cone. Thanks to their robust shaft, the flags can be quickly and easily inserted into the snow by hand. The flag fabric is made of durable, weather-resistant tarpaulin material to which snow and ice hardly adhere – even in extreme conditions. The vibrant colors ensure excellent visibility, even in fog or poor weather.

**Product features:**

Weatherproof, robust tarpaulin material

Good visibility even in diffuse light

Colors: red, blue, and yellow

Ideal for avalanche rescue, training, and operational exercises

Art. No.	93905	
Dimensions	Length:	650 mm
Weight	Total:	45 g
Material	Aluminium/Tarpaulin
