

AVALANCHE-TRAININGS-PAD „BODY“

PAD in **human form** in a high-quality fabric combination for realistic training.

Easily transportable; water-repellent material.

Bag for the integration of a buried victim search device. The device should also be protected against the probe tip. (Avalanche search device not included)

Fastening straps for carabiners so that several pads can be linked together for simulation.

A **Recco RescueReflector** for the Recco search can also be attached to the fastening strap. (Recco Reflector not included) A 20x10cm aluminum plate is integrated in the leg area. This is used to simulate different substances.

Ski poles or ski boots can simply be **attached** to the pad, thus ensuring a realistic excavation situation.

Developed together with the **Tyrolean mountain rescue Team**.

Art. No.	93921	
Dimensions	Length:	1.850 mm
	Width:	500 mm
Weight	Total:	0,8 kg
